

B.Sc. DEGREE (C.B.C.S.S.) EXAMINATION, MARCH 2015**Sixth Semester****Core Course—COMPUTATIONAL PHYSICS**

[Common for Model – I B.Sc. Physics, Model – II B.Sc. Physics and B.Sc. Physics—E.E.M.]

Time : Three Hours

Maximum Weight : 25

Part A (Objective Type Questions)*Answer all questions.**Each bunch of four questions carries a weight of 1.***Bunch I**

1. A computer program that translates an assembly language program from mnemonics to the binary machine code of a computer :
 - (a) Compiler.
 - (b) Interpreter.
 - (c) Assembler.
 - (d) None of these.
2. A state member function in C++ can be called by using _____.
 - (a) Class name.
 - (b) Object name.
 - (c) User defined name.
 - (d) None of these.
3. The address bus is :
 - (a) Unidirectional.
 - (b) Bidirectional.
 - (c) Tridirectional.
 - (d) None of these.
4. _____ is used as a memory pointer for the stack memory.

Bunch II

5. The data to be operated on is called :
 - (a) Operation code.
 - (b) Operand.
 - (c) Instruction.
 - (d) None of these.
6. Which one of the following are the manipulators in C++ ?
 - (a) Endl.
 - (b) Malloc.
 - (c) Const.
 - (d) Void.

Turn over

7. _____ is an exist-controlled corp :
- (a) While. (b) do — while.
(c) For. (d) None of these.
8. Second order R-K method is known as _____.

Bunch III

9. D flip-flop is called a :
- (a) Transparent latch. (b) Priority encoder.
(c) Binary decoder. (d) None of these.
10. Which header file contains the definition of class string ?
- (a) <Math.h>. (b) <stdio.h>.
(c) <string.h>. (d) None of these.
11. The programming technique used to instruct the microprocessor repeat tasks is called as :
- (a) Fetching. (b) Looping.
(c) Cycling. (d) All of the above.
12. Insulation of date from direct access by the program is called :
- (a) Date hiding. (b) Date abstraction.
(c) Date encapsulation. (d) None of these.

Bunch IV

13. The symbol that designates a comment in C++ is :
- (a) % . (b) // .
(c) & . (d) # .
14. Which one of the following is not an output device of a computer system ?
- (a) Scanner. (b) Monitor.
(c) Speaker. (d) Plotter.
15. "India" is an example of a _____.
- (a) String constant. (b) Variable.
(c) Function name. (d) Character.
16. By default, members of the class are _____.
- (a) Public. (b) Private.
(c) Protected. (d) None of these.

Part B (Short Answer Questions)

Answer any five questions.

Each question carries a weight of 1.

17. Define address bar.
18. Differentiate between Program counter and Stack pointer.
19. What is a reference variable ?
20. What do you mean by dynamic initialization of variables in C++ ?
21. What is structure in C++ ? Give the syntax.
22. What is an exit controlled loop ?
23. State and define the flags of 8085 microprocessor.
24. How can you declare the variables inside a class in C++ ?

(5 × 1 = 5)

Part C (Short Essay/Problems)

Answer any four questions.

Each question carries a weight of 2.

25. Discuss about the tri-state devices.
26. Explain the differences between a microprocessor and a microcomputer.
27. What is friend function ? Write the characteristics of the friend function.
28. Differentiate between call by reference and call by value in C++.
29. Write short notes on logical and branching operations of 8085 instruction set.
30. Write about the addressing modes of 8085 instruction set.

(4 × 2 = 8)

Part D (Essay Questions)

Answer any two questions.

Each question carries a weight of 4.

31. Explain microprocessor architecture and its operations ?
32. Write a C++ program to perform various string operations such as read, display, copy and concatenate using class.
33. Find out root $X^3 - 3X - 5 = 0$ by the method of false position.

(2 × 4 = 8)
